PHOENIX®
True way to weigh

Mother & Child Growth Monitoring System

- **High Accuracy**
- **Sturdy & Durable**
- **Bright Digital Display**
- **LI-Ion Rechargeable Battery**
- **Bluetooth Enabled**
- **Data Transfer from Device to Mobile App**

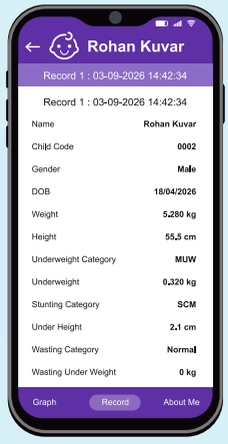

Portable Design

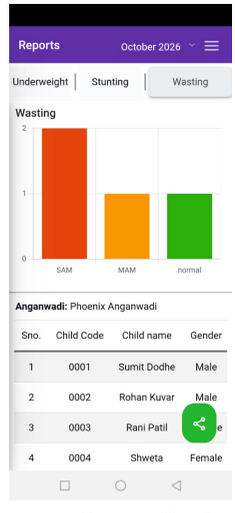

- Child & Adult Growth Monitoring System incorporates state-of-the-art embedded technology. Its lightweight, portable design, ease of operation, and high efficiency make it an ideal choice for monitoring malnutrition among children and adults in Anganwadis, Primary Health Centres (PHCs), NICUs, and hospitals.

Salient Features :

- The machine is equipped with built-in Bluetooth connectivity, enabling data transfer to web-based applications for comprehensive monitoring and assessment of a child's physical growth and development.
- Li-Ion rechargeable battery provides operational back-up upto 40 hours on a full charge.
- For safe and convenient weighing of infants, a large and detachable ABS bowl is supplied with the scale. (550mm x 300mm)

It generates results based on all three World Health Organization (WHO) growth indicators: Underweight, Stunting, and Wasting. It also quantifies the extent of underweight and stunting in the child.

App Screen Shot

Specifications :

Maximum Capacity : 150 kg, Accuracy : 10 g for children and 100 g for adults.
Operating Temperature Range : 0°C to 50°C. Platter Dimensions: 310 mm × 285 mm
Overall Dimensions : 342 mm (L) × 330 mm (W) × 94 mm (H)

Approvals : ✓ Weights and Measure Department's Model Approval. ✓ ISO-9001 Certified. ✓ BIS Certificate (ISI Mark)
